**(54) BATHING AGENT  
CONTAINING EXTRACT  
FROM YUCCA AND ITS  
PRODUCTION**

(57) Abstract:

**PROBLEM TO BE SOLVED:**

To obtain a bathing agent which gives not only moistness but also reduced greasy touch to skin after bathing and shows sufficient effect in use in a lower concentration in comparison with usual bathing agents and to provide its producing method.

**BEST AVAILABLE COPY**

**SOLUTION:** This bathing agent is characterized by including an extract from Yucca and it is preferable that this extract includes saponin, flavone, resveratrol and sugar. This

bathing agent gives the sufficient effect by adding the extract from Yucca in an amount of 0.001-5 g based on 100 L of water in terms of the solid content of the extract. This extract from Yucca is suitably produced by making chips from at least one of Yucca roots and stems and then drying or initially drying and then making chips followed by grinding the dried chips to be powder and then immersing the resultant powder into a mixed solvent between a 1-3C lower alcohol and water to extract.
